PRABANJAN U V

Bengaluru, Karnataka, India | Open to relocation across India
+91-9449501521 prabhanjanuv@gmail.com LinkedIn GitHub LeetCode HackerRank

Professional Summary

Software engineering graduate (B.Tech IT, 2026) building full-stack web applications with Java, React, Node.js, and REST APIs. Strong in data structures, algorithms, and OOP, with experience in data analytics and applied AI. Co-authored research accepted at ICETIST'26 and presented at ITIKD 2025.

Education

Alliance University, Bengaluru — B.Tech, Information Technology *May 2026*
CGPA: 8.0
Akshara PU Science College — PUC, 78.8% *2022*
Akshara Residential School — ICSE, 80.6% *2020*

Technical Skills

Languages: Java, JavaScript, Python, C++, PHP
Web: React.js, Node.js, Express.js, MERN stack, REST APIs, HTML5, CSS3, Bootstrap
Databases: MySQL, PostgreSQL, MongoDB, Supabase, Firebase
Core Concepts: Data Structures & Algorithms, OOP, CRUD, Authentication, Role-Based Access Control
Tools & Cloud: Git, GitHub, VS Code, Postman, Jupyter Notebook, Oracle Cloud, GCP/AWS basics, Azure AZ-204 (preparing)

Experience

Java Full-Stack Web Development Training *6-month program (4 months completed)*
TAP Academy

- Solved 524 practice problems across Java quizzes, coding scenarios, and programming assignments on the TAP Academy platform.
- Solved 217 of 253 programming problems on arrays, strings, subarrays, loops, and substrings, completing 12 of 16 modules.
- Completed Java OOP modules on methods, overloading, and encapsulation; currently progressing through inheritance and polymorphism.

AI for Sustainability Virtual Internship *Dec 2025 – Jan 2026*
1M1B (AICTE & IBM SkillsBuild)

- Contributed to an AI-enabled software project in an Agile team, covering requirements analysis and debugging.
- Applied cloud technologies and data-processing techniques to sustainability-focused project work and milestone delivery.

Selected Projects

Annual Report Portal | *Java, React.js, Node.js, Express.js, Supabase*

- Built a full-stack annual-report management portal with REST APIs, database operations, and authentication.
- Implemented role-based access control; the project formed the basis of an ICETIST'26 research paper.

TrendCart – E-Commerce Platform | *JavaScript, MongoDB, Express.js, React.js, Node.js*

- Developed product-management and cart features with MongoDB CRUD operations and REST API integration.
- Designed responsive React interfaces for browsing products and managing the shopping cart.

AI-Driven Nutritional Intelligence System | *Python, Java, ML, Data Analytics*

- Built a machine-learning dietary recommendation system with data-cleaning and analysis pipelines.
- Presented findings at ITIKD 2025.

Certifications & Achievements

- **Oracle:** Cloud Infrastructure 2025 Certified AI Foundations Associate; Cloud Database Services 2025 Professional; Certified Foundations Associate.
- **Research:** Paper accepted at ICETIST'26 (CRC Press proceedings); research presented at ITIKD 2025.
- **Coursework:** AI for Sustainability (1M1B, AICTE & IBM SkillsBuild); Developing Front-End Apps with React and Data Structures (Coursera).
- **Simulations & Ratings:** Deloitte Australia Data Analytics Job Simulation (Forage); HackerRank 4-star Java, 3-star Python, Problem Solving (Basic).
